PROFILE SUMMARY

B.Tech Computer Science graduate with hands-on experience in developing machine learning and deep learning models. Skilled in Python, data preprocessing, and model optimization with exposure to NLP and AI frameworks. Experienced in delivering impactful projects involving treatment optimization, predictive modeling, and intelligent system design. Strong problem-solving, teamwork, and adaptability, eager to contribute to innovative AI solutions.

SKILLS

- **Programming Languages:** Python, SQL, HTML, Java (basic), C , C++

- **Tools & Platforms:** VS Code, GitHub, Jupyter Notebook, Google Cloud Platform (GCP), ChatGPT

- **Soft Skills :** Adaptability, Communication, Teamwork, Analytical Thinking

PROJECTS

- **Personalized Treatment Optimization and Side Effect Prediction For Lung Cancer**   Apr 2025

Trained a Machine Learning model that helps in choosing the person-specific treatment along with predicting the side effects using BERT and Ensemble Learning ,Worked with large datasets, applying data preprocessing, model training, and evaluation techniques.

- **Smart Slot Assignment for Urban EV Charging**   Apr 2024

Developed a web-based EV charging management system using Flask, MySQL, and Folium Map API to optimize real-time charging allocation, enable pre-booking, and improve station efficiency.
